JOURNAL OF Inorganic Biochemistry

www.elsevier.nl/locate/jinorgbio

Subject Index of Volume 83

Aminoalcohol
complexation of the antihypertensive drug oxprenolol with copper(II), 25
Amphibole minerals
free radical activity of natural and heat treated amphibole asbestos, 211
Anaerobic condition
crystal structures of substrate free and complex forms of reactivated BphC, an extradiol type ring-cleavage dioxygenase, 269
Anaerobic oxidation
interaction between iron(II) and hydroxamic acids: oxidation of iron(II) to iron(III) by desferrioxamine B under anaerobic conditions, 107
Anticancer
cellular effects of transferrin coordinated to $[Cl(NH_3)_5Ru]Cl_2$ and *cis*-$[Cl_2(NH_3)_4Ru]Cl$, 139
Antihypertensive drug
complexation of the antihypertensive drug oxprenolol with copper(II), 25
Antimicrobial activity
copper(II) complexes with phenoxyalkanoic acids and nitrogen donor heterocyclic ligands: structure and bioactivity, 7
Antioxidative and antitumour activities
synthesis, characterization, antioxidative and antitumor activities of solid quercetin rare earth(III) complexes, 41
Antitumor agents
capillary electrophoretic study of carboplatin and analogues with nucleoside monophosphates, di- and trinucleotides, 181
Antitumor drugs
the in vitro antitumour profile of some 1,2-diaminocyclohexane organotin complexes, 217
Antitumor
inhibition of human topoisomerase II by the antitumor metallocenes, 205
Antitumour activity
synthesis and antitumour activity of platinum(II) and platinum(IV) complexes containing ethylenediamine-derived ligands having alcohol, carboxylic acid and acetate substituents, 91
Apoptosis
synthesis, characterisation, X-ray structure and biological activity of three new 5-formyluracil thiosemicarbazone complexes, 169
Asbestosis
free radical activity of natural and heat treated amphibole asbestos, 211
ATP–Fe^{3+} complex
binding site of Fe^{3+} at purine of ATP as studied by NMR, 101

Binding site
binding site of Fe^{3+} at purine of ATP as studied by NMR, 101
Bisphosphonates
metal-ion speciation in blood plasma incorporating the tetraphosphonate, N,N-dimethylenephosphonate-1-hydroxy-4-aminopropilydenediphosphonate (APDDMP), in therapeutic radiopharmaceuticals, 57

Blood plasma
metal-ion speciation in blood plasma incorporating the tetraphosphonate, N,N-dimethylenephosphonate-1-hydroxy-4-aminopropilydenediphosphonate (APDDMP), in therapeutic radiopharmaceuticals, 57

Capillary electrophoresis
capillary electrophoretic study of carboplatin and analogues with nucleoside monophosphates, di- and trinucleotides, 181
Carbon–cobalt bond
molecular modeling of the mechanochemical triggering mechanism for catalysis of carbon–cobalt bond homolysis in coenzyme B_{12}, 121
Carboplatin
capillary electrophoretic study of carboplatin and analogues with nucleoside monophosphates, di- and trinucleotides, 181
Carboxylate anchor
potentiometric and spectroscopic studies on the dimethyltin(IV) complexes of 2-hydroxyhippuric acid, 187
Catalytic activity
comparison of three fungal laccases from *Rigidoporus lignosus* and *Pleurotus ostreatus:* correlation between conformation changes and catalytic activity, 67
Chloroperoxidase
synthetic active site analogues of heme–thiolate proteins. Characterization and identification of intermediates of the catalytic cycles of cytochrome $P450_{cam}$ and chloroperoxidase, 289
Co(I)/Co(II)/Co(III)–tetradehydrocorrins
synthesis, structure and properties of 1,19-disubstituted tetradehydrocorrin cobalt complexes, 133
Cobalt(III) complexes
DNA-binding and photocleavage studies of cobalt(III) polypyridyl complexes: $[Co(phen)_2IP]^{3+}$ and $[Co(phen)_2PIP]^{3+}$, 49
Coenzyme B_{12}
molecular modeling of the mechanochemical triggering mechanism for catalysis of carbon–cobalt bond homolysis in coenzyme B_{12}, 121
Complex
interaction between iron(II) and hydroxamic acids: oxidation of iron(II) to iron(III) by desferrioxamine B under anaerobic conditions, 107
Configuration interaction
calculation of the electronic structure and spectra of model cytochrome P450 compound I, 309
Conformation changes
comparison of three fungal laccases from *Rigidoporus lignosus* and *Pleurotus ostreatus:* correlation between conformation changes and catalytic activity, 67
Copper
cloning, sequence analysis, and characterization of the 'Lysyl Oxidase' from *Pichia Pastoris*, 193
the DNA-bound orientation of Cu(II)·Xaa-Gly-His metallopeptides, 17

Elsevier Science B.V.
PII: S0162-0134(01)00177-5

Copper binding
reactivity of Cd_7-metallothionein with Cu(II) ions: evidence for a cooperative formation of Cd_3,$Cu(I)_5$-metallothionein, 1
Copper(II) complexes
complexation of the antihypertensive drug oxprenolol with copper(II), 25
Crystal structure
copper(II) complexes with phenoxyalkanoic acids and nitrogen donor heterocyclic ligands: structure and bioactivity, 7
crystal structures of substrate free and complex forms of reactivated BphC, an extradiol type ring-cleavage dioxygenase, 269
sugar interaction with metal ions. The crystal structure and Raman spectra study of $SmCl_3$–galactitol complex, 161
Cu(I)
redox properties and acid–base equilibria of zucchini mavicyanin, 223
Cu(II) center
the EPR spectrum for Cu_B in cytochrome *c* oxidase, 115
Cu(II) complexes
copper(II) complexes with phenoxyalkanoic acids and nitrogen donor heterocyclic ligands: structure and bioactivity, 7
Cu, Ni, Co Complexes
synthesis, characterisation, X-ray structure and biological activity of three new 5-formyluracil thiosemicarbazone complexes, 169
Cysteine-sulfenic acid
Fe-type nitrile hydratase, 247
Cysteine-sulfinic acid
Fe-type nitrile hydratase, 247
Cytochrome
perturbations at the high spin heme *b* center in the membrane-bound nitric oxide reductase, 281
Cytochrome c oxidase
Heme–Cu complexes as oxygen-activating functional models for the active site of cytochrome c oxidase, 239
the EPR spectrum for Cu_B in cytochrome *c* oxidase, 115
Cytochrome P450
effect of microsome–liposome fusion on the rotational mobility of cytochrome P450IIB4 in rabbit liver microsomes, 261
synthetic active site analogues of heme–thiolate proteins. Characterization and identification of intermediates of the catalytic cycles of cytochrome $P450_{cam}$ and chloroperoxidase, 289
Cytochrome P450cam
putidaredoxin–cytochrome P450cam interaction, 255
Cytotoxic activity
platinum(II) and palladium(II) complexes with dithiocarbamates and amines: synthesis, characterization and cell assay, 31

Density functional theory
calculation of the electronic structure and spectra of model cytochrome P450 compound I, 309
Desferrioxamine B
interaction between iron(II) and hydroxamic acids: oxidation of iron(II) to iron(III) by desferrioxamine B under anaerobic conditions, 107
1,2-Diaminocyclohexane
the in vitro antitumour profile of some 1,2-diaminocyclohexane organotin complexes, 217
Dimethyltin(IV)
potentiometric and spectroscopic studies on the dimethyltin(IV) complexes of 2-hydroxyhippuric acid, 187
Diorganotin complexes
the in vitro antitumour profile of some 1,2-diaminocyclohexane organotin complexes, 217
Dithiocarbamate
platinum(II) and palladium(II) complexes with dithiocarbamates and amines: synthesis, characterization and cell assay, 31
DNA
cellular effects of transferrin coordinated to $[Cl(NH_3)_5Ru]Cl_2$ and *cis*-$[Cl_2(NH_3)_4Ru]Cl$, 139
DNA binding
synthesis, characterization, antioxidative and antitumor activities of solid quercetin rare earth(III) complexes, 41
DNA-binding and photocleavage studies of cobalt(III) polypyridyl complexes: $[Co(phen)_2IP]^{3+}$ and $[Co(phen)_2PIP]^{3+}$, 49
DNA-fiber
the DNA-bound orientation of Cu(II)·Xaa-Gly-His metallopeptides, 17
DNA relaxation
inhibition of human topoisomerase II by the antitumor metallocenes, 205

Electron spin resonance (EPR)
perturbations at the high spin heme *b* center in the membrane-bound nitric oxide reductase, 281
Enzyme models
synthetic active site analogues of heme–thiolate proteins. Characterization and identification of intermediates of the catalytic cycles of cytochrome $P450_{cam}$ and chloroperoxidase, 289
EPR
putidaredoxin–cytochrome P450cam interaction, 255
the DNA-bound orientation of Cu(II)·Xaa-Gly-His metallopeptides, 17
EPR spectrum
the EPR spectrum for Cu_B in cytochrome *c* oxidase, 115
Ethylenediamine-*N*,*N*′-diacetate
synthesis and antitumour activity of platinum(II) and platinum(IV) complexes containing ethylenediamine-derived ligands having alcohol, carboxylic acid and acetate substituents, 91
Extradiol type dioxygenase
crystal structures of substrate free and complex forms of reactivated BphC, an extradiol type ring-cleavage dioxygenase, 269

Fe(II)/Fe(III)
interaction between iron(II) and hydroxamic acids: oxidation of iron(II) to iron(III) by desferrioxamine B under anaerobic conditions, 107
Ferrous–NO complex
a proximal tryptophan in NO synthase controls activity by a novel mechanism, 301
Free radicals
free radical activity of natural and heat treated amphibole asbestos, 211
5-Formyluracil thiosemicarbazone
synthesis, characterisation, X-ray structure and biological activity of three new 5-formyluracil thiosemicarbazone complexes, 169
Fungal laccases
comparison of three fungal laccases from *Rigidoporus lignosus* and *Pleurotus ostreatus:* correlation between conformation changes and catalytic activity, 67

Heme–NO complex
a proximal tryptophan in NO synthase controls activity by a novel mechanism, 301
Heme–thiolate proteins
synthetic active site analogues of heme–thiolate proteins. Characterization and identification of intermediates of the catalytic cycles of cytochrome $P450_{cam}$ and chloroperoxidase, 289

Histidine
the DNA-bound orientation of Cu(II)·Xaa-Gly-His metallopeptides, 17
^{166}Ho
metal-ion speciation in blood plasma incorporating the tetraphosphonate, N,N-dimethylenephosphonate-1-hydroxy-4-aminopropilydenediphosphonate (APDDMP), in therapeutic radiopharmaceuticals, 57
Homolysis
molecular modeling of the mechanochemical triggering mechanism for catalysis of carbon–cobalt bond homolysis in coenzyme B_{12}, 121
Hydroxamic acid
interaction between iron(II) and hydroxamic acids: oxidation of iron(II) to iron(III) by desferrioxamine B under anaerobic conditions, 107
Hydroxo, chloro, ethylenediamine-derived ligands
synthesis and antitumour activity of platinum(II) and platinum(IV) complexes containing ethylenediamine-derived ligands having alcohol, carboxylic acid and acetate substituents, 91
2-Hydroxyhippuric acid
potentiometric and spectroscopic studies on the dimethyltin(IV) complexes of 2-hydroxyhippuric acid, 187

Infrared spectroscopy
putidaredoxin–cytochrome P450cam interaction, 255

Lipid-enrichment
effect of microsome–liposome fusion on the rotational mobility of cytochrome P450IIB4 in rabbit liver microsomes, 261
Lipid peroxidation
induction of aerobic peroxidation of liposomal membranes by bis(cyclopentadienyl)-vanadium(IV) (acetylacetonate) complexes, 151
Liposomes
induction of aerobic peroxidation of liposomal membranes by bis(cyclopentadienyl)-vanadium(IV) (acetylacetonate) complexes, 151
Lysosomes
the interaction of tributyllead with lysosomes from rat liver, 229
Lysyl oxidase
cloning, sequence analysis, and characterization of the 'Lysyl Oxidase' from *Pichia Pastoris*, 193

Magnetic circular dichroism (MCD)
perturbations at the high spin heme *b* center in the membrane-bound nitric oxide reductase, 281
Mavicyanin
redox properties and acid–base equilibria of zucchini mavicyanin, 223
Mechanochemical triggering
molecular modeling of the mechanochemical triggering mechanism for catalysis of carbon–cobalt bond homolysis in coenzyme B_{12}, 121
Membrane fusion
effect of microsome–liposome fusion on the rotational mobility of cytochrome P450IIB4 in rabbit liver microsomes, 261
Metal-thiolate clusters
reactivity of Cd_7-metallothionein with Cu(II) ions: evidence for a cooperative formation of Cd_3,$Cu(I)_5$-metallothionein, 1
Metallocene dihalides
inhibition of human topoisomerase II by the antitumor metallocenes, 205
Metallothionein
reactivity of Cd_7-metallothionein with Cu(II) ions: evidence for a cooperative formation of Cd_3,$Cu(I)_5$-metallothionein, 1
Methionine peptides
solution equilibria and structural characterisation of the palladium(II) and mixed metal complexes of peptides containing methionyl residues, 77
Mixed metal complex
solution equilibria and structural characterisation of the palladium(II) and mixed metal complexes of peptides containing methionyl residues, 77
Molecular modeling
the DNA-bound orientation of Cu(II)·Xaa-Gly-His metallopeptides, 17
Multiconfigurational ground states
calculation of the electronic structure and spectra of model cytochrome P450 compound I, 309

Neuronal notric oxide synthase
a proximal tryptophan in NO synthase controls activity by a novel mechanism, 301
Nitric oxide reductase (NOR)
perturbations at the high spin heme *b* center in the membrane-bound nitric oxide reductase, 281
Nitrile hydratase
Fe-type nitrile hydratase, 247
NMR
binding site of Fe^{3+} at purine of ATP as studied by NMR, 101
solution equilibria and structural characterisation of the palladium(II) and mixed metal complexes of peptides containing methionyl residues, 77
NO
perturbations at the high spin heme *b* center in the membrane-bound nitric oxide reductase, 281
Non-heme iron
Fe-type nitrile hydratase, 247
Nucleotides
capillary electrophoretic study of carboplatin and analogues with nucleoside monophosphates, di- and trinucleotides, 181

Oxprenolol
complexation of the antihypertensive drug oxprenolol with copper(II), 25
Oxygen activation
Heme–Cu complexes as oxygen-activating functional models for the active site of cytochrome c oxidase, 239
induction of aerobic peroxidation of liposomal membranes by bis(cyclopentadienyl)-vanadium(IV) (acetylacetonate) complexes, 151
Oxygenation
Heme–Cu complexes as oxygen-activating functional models for the active site of cytochrome c oxidase, 239

P450 Compound I
calculation of the electronic structure and spectra of model cytochrome P450 compound I, 309
Palladium(II)
solution equilibria and structural characterisation of the palladium(II) and mixed metal complexes of peptides containing methionyl residues, 77
Palladium(II) complexes
platinum(II) and palladium(II) complexes with dithiocarbamates and amines: synthesis, characterization and cell assay, 31
Peroxy complex
Heme–Cu complexes as oxygen-activating functional models for the active site of cytochrome c oxidase, 239
Phenoxyalkanoic acids
copper(II) complexes with phenoxyalkanoic acids and nitrogen donor heterocyclic ligands: structure and bioactivity, 7

Photocleavage
DNA-binding and photocleavage studies of cobalt(III) polypyridyl complexes: $[Co(phen)_2IP]^{3+}$ and $[Co(phen)_2PIP]^{3+}$, 49
Pichia pastoris
cloning, sequence analysis, and characterization of the 'Lysyl Oxidase' from *Pichia Pastoris*, 193
Platinum complexes
synthesis and antitumour activity of platinum(II) and platinum(IV) complexes containing ethylenediamine-derived ligands having alcohol, carboxylic acid and acetate substituents, 91
Platinum(II) complexes
platinum(II) and palladium(II) complexes with dithiocarbamates and amines: synthesis, characterization and cell assay, 31
Pleurotus ostreatus
comparison of three fungal laccases from *Rigidoporus lignosus* and *Pleurotus ostreatus:* correlation between conformation changes and catalytic activity, 67
Post-translational modification
Fe-type nitrile hydratase, 247
Potentiometric study
potentiometric and spectroscopic studies on the dimethyltin(IV) complexes of 2-hydroxyhippuric acid, 187
Potentiometry
metal-ion speciation in blood plasma incorporating the tetraphosphonate, N,N-dimethylenephosphonate-1-hydroxy-4-aminopropilydenediphosphonate (APDDMP), in therapeutic radiopharmaceuticals, 57
solution equilibria and structural characterisation of the palladium(II) and mixed metal complexes of peptides containing methionyl residues, 77
PUC18 plasmid
free radical activity of natural and heat treated amphibole asbestos, 211
Putidaredoxin
putidaredoxin–cytochrome P450cam interaction, 255

Quercetin complexes
synthesis, characterization, antioxidative and antitumor activities of solid quercetin rare earth(III) complexes, 41

Raman
sugar interaction with metal ions. The crystal structure and Raman spectra study of $SmCl_3$–galactitol complex, 161
Rare earth metal(III)
synthesis, characterization, antioxidative and antitumor activities of solid quercetin rare earth(III) complexes, 41
Reaction mechanism
synthetic active site analogues of heme–thiolate proteins. Characterization and identification of intermediates of the catalytic cycles of cytochrome $P450_{cam}$ and chloroperoxidase, 289
Redoxpotential
synthetic active site analogues of heme–thiolate proteins. Characterization and identification of intermediates of the catalytic cycles of cytochrome $P450_{cam}$ and chloroperoxidase, 289
Relaxation enhancement
binding site of Fe^{3+} at purine of ATP as studied by NMR, 101
Rigidoporus lignosus
comparison of three fungal laccases from *Rigidoporus lignosus* and *Pleurotus ostreatus:* correlation between conformation changes and catalytic activity, 67
Ruthenium
cellular effects of transferrin coordinated to $[Cl(NH_3)_5Ru]Cl_2$ and *cis*-$[Cl_2(NH_3)_4Ru]Cl$, 139

^{153}Sm
metal-ion speciation in blood plasma incorporating the tetraphosphonate, N,N-dimethylenephosphonate-1-hydroxy-4-aminopropilydenediphosphonate (APDDMP), in therapeutic radiopharmaceuticals, 57
Sm–galactitol complex
sugar interaction with metal ions. The crystal structure and Raman spectra study of $SmCl_3$–galactitol complex, 161
Speciation
metal-ion speciation in blood plasma incorporating the tetraphosphonate, N,N-dimethylenephosphonate-1-hydroxy-4-aminopropilydenediphosphonate (APDDMP), in therapeutic radiopharmaceuticals, 57
Spectroscopic study
potentiometric and spectroscopic studies on the dimethyltin(IV) complexes of 2-hydroxyhippuric acid, 187
Spectroscopy
reactivity of Cd_7-metallothionein with Cu(II) ions: evidence for a cooperative formation of Cd_3,$Cu(I)_5$-metallothionein, 1
Spin state
synthetic active site analogues of heme–thiolate proteins. Characterization and identification of intermediates of the catalytic cycles of cytochrome $P450_{cam}$ and chloroperoxidase, 289
Structure reactivity
reactivity of Cd_7-metallothionein with Cu(II) ions: evidence for a cooperative formation of Cd_3,$Cu(I)_5$-metallothionein, 1
Substrate complex
crystal structures of substrate free and complex forms of reactivated BphC, an extradiol type ring-cleavage dioxygenase, 269
Supercoiled DNA
free radical activity of natural and heat treated amphibole asbestos, 211

Tetradehydrocorrin
synthesis, structure and properties of 1,19-disubstituted tetradehydrocorrin cobalt complexes, 133
Tetraplatin
the in vitro antitumour profile of some 1,2-diaminocyclohexane organotin complexes, 217
Therapeutic radiopharmaceuticals
metal-ion speciation in blood plasma incorporating the tetraphosphonate, N,N-dimethylenephosphonate-1-hydroxy-4-aminopropilydenediphosphonate (APDDMP), in therapeutic radiopharmaceuticals, 57
Topoisomerase II
inhibition of human topoisomerase II by the antitumor metallocenes, 205
Topoisomerase inhibition
inhibition of human topoisomerase II by the antitumor metallocenes, 205
Toxicity
cellular effects of transferrin coordinated to $[Cl(NH_3)_5Ru]Cl_2$ and *cis*-$[Cl_2(NH_3)_4Ru]Cl$, 139
TPQ
cloning, sequence analysis, and characterization of the 'Lysyl Oxidase' from *Pichia Pastoris*, 193
Transferrin
cellular effects of transferrin coordinated to $[Cl(NH_3)_5Ru]Cl_2$ and *cis*-$[Cl_2(NH_3)_4Ru]Cl$, 139
Transient species spectra
calculation of the electronic structure and spectra of model cytochrome P450 compound I, 309
Tributyllead
the interaction of tributyllead with lysosomes from rat liver, 229

Uncoupling
the interaction of tributyllead with lysosomes from rat liver, 229

Vanadocene complexes
induction of aerobic peroxidation of liposomal membranes by bis(cyclopentadienyl)-vanadium(IV) (acetylacetonate) complexes, 151
Vitamin B_{12} model
synthesis, structure and properties of 1,19-disubstituted tetradehydrocorrin cobalt complexes, 133

X-ray crystallography
crystal structures of substrate free and complex forms of reactivated BphC, an extradiol type ring-cleavage dioxygenase, 269
X-ray structure
synthesis, characterisation, X-ray structure and biological activity of three new 5-formyluracil thiosemicarbazone complexes, 169

Zucchini
redox properties and acid–base equilibria of zucchini mavicyanin, 223
